

The Future of Interoperability – Fresh Looks for 2008

The MultiService Forum cordially invites you to join us at the Hotel Nikko in San Francisco for a special event being held in conjunction with the upcoming MSF Technical Committee Meeting. The session, titled “The Future of Interoperability – Fresh Looks for 2008” will be held on Tuesday, January 29, 2008 and will include an interactive discussion on the future of interoperability in the MSF.

Our distinguished panel includes speakers from BT, Verizon, Ericsson and Fujitsu who will discuss the future of interoperability and their experiences with MSF’s interoperability program, GMI. Discover the future of network deployments with an announcement of new test scenarios planned for GMI 2008. The speakers will also address the MSF’s new NGN Certification Program and NGN Test Bed. The session will be moderated by Ryan Koontz, Principal Analyst for Inflection Point Research, LLP.

Space is limited, so please RSVP to Julianne Fitzpatrick at jfitzpatrick@msforum.org by Tuesday, January 22, 2008.

Refreshments will be served.
